

MECCANICA DI PRECISIONE S.r.l.

*The innovation in tradition*

Company Profile

## OUR HISTORY

1967

Sudati Meccanica di Precisione Srl was founded as a sole proprietorship "**Sudati Alfredo**" by Mr. Alfredo, with the resourcefulness that distinguished several entrepreneurs of the past generation. The company was first equipped in a basement to produce **shafts for electric motors**.

1972

Thanks to his knowledge and experience in turning and grinding, Mr. Alfredo was constantly increasing production, so much that he decided to move to a own new **shed**. At the same time, he increased his fleet of machines and also his customer base.

1987

The **area** of the first hall was **doubled**, thanks to new technologies, too: the machines changed, from manuals they became more and more **numerically controlled**.

1991

The sole proprietorship Sudati Alfredo was transformed into **Sudati Srl**, maintaining its **production identity in shafts for electric motors** (mainly for heating and air conditioning). This production requires, also nowadays, a particular attention to the surface finish of the trees and it is the reason why, over the years, Sudati Srl acquired a **particular specialization in the final grinding**.

1995

The **shed is further expanded** and today it has a covered area of **1400 square meters**.

2012

In the last months of **2012**, **Sudati Srl** was transformed in **SUDATI MECCANICA DI PRECISIONE Srl**.

**Operationally**, however, it became so during **the first months of 2013**.

2019

The **transition of all production machines** from manual to **numerical control** is now recent history. In recent years, in fact, the company invested **considerable resources for the improvement of the production phases and control**. Sudati Meccanica di Precisione Srl has set itself the goal of further expanding the customer base through the **certification of the Quality System**, too.

# TYPE OF PRODUCTION

Sudati Meccanica di Precisione Srl produces **shafts for electric motors and precision mechanical parts** on the customer's drawing through turning and grinding processes.

## WORKABLE DIMENSIONS

### TURNING

- diameters from 6 mm to 250 mm
- lengths up to 700 mm

### RECTIFICATION

- diameters from 4 mm to 250 mm

The constant **technological updating** of production plants and control systems, adequate **staff preparation**, **long experience** gained in the execution of turning, grinding and resuming processes, allow the company to meet the **increasing customer and market needs**.

# INDUSTRIES SERVED

The parts made by Sudati Meccanica di Precisione Srl are used in the precision components sector such as:

- ✓ plant engineering for the conditioning
- ✓ pneumatic
- ✓ electromechanical
- ✓ automotive
- ✓ oleodynamics
- ✓ mechanics in general

With a staff of **10 employees** and a wide range of **machine tools** (**CNC** lathes, multi-spindles, transfer machines, traditional machines for turning and milling, **grinding** with centres and centerless, plunge and threaded, rollers, miter saws, etc. ), Sudati Meccanica di Precisione Srl can **meet requests for small, medium and large series**.

## VALUE OFFERED

The main characteristic of Sudati Meccanica di Precisione Srl is **to ensure the best performance** in terms of **quality** of workmanship, **reliability** and **flexibility** according to the quality/price ratio.

Particular attention is **given to compliance** with safety and healthy regulations in the work place.

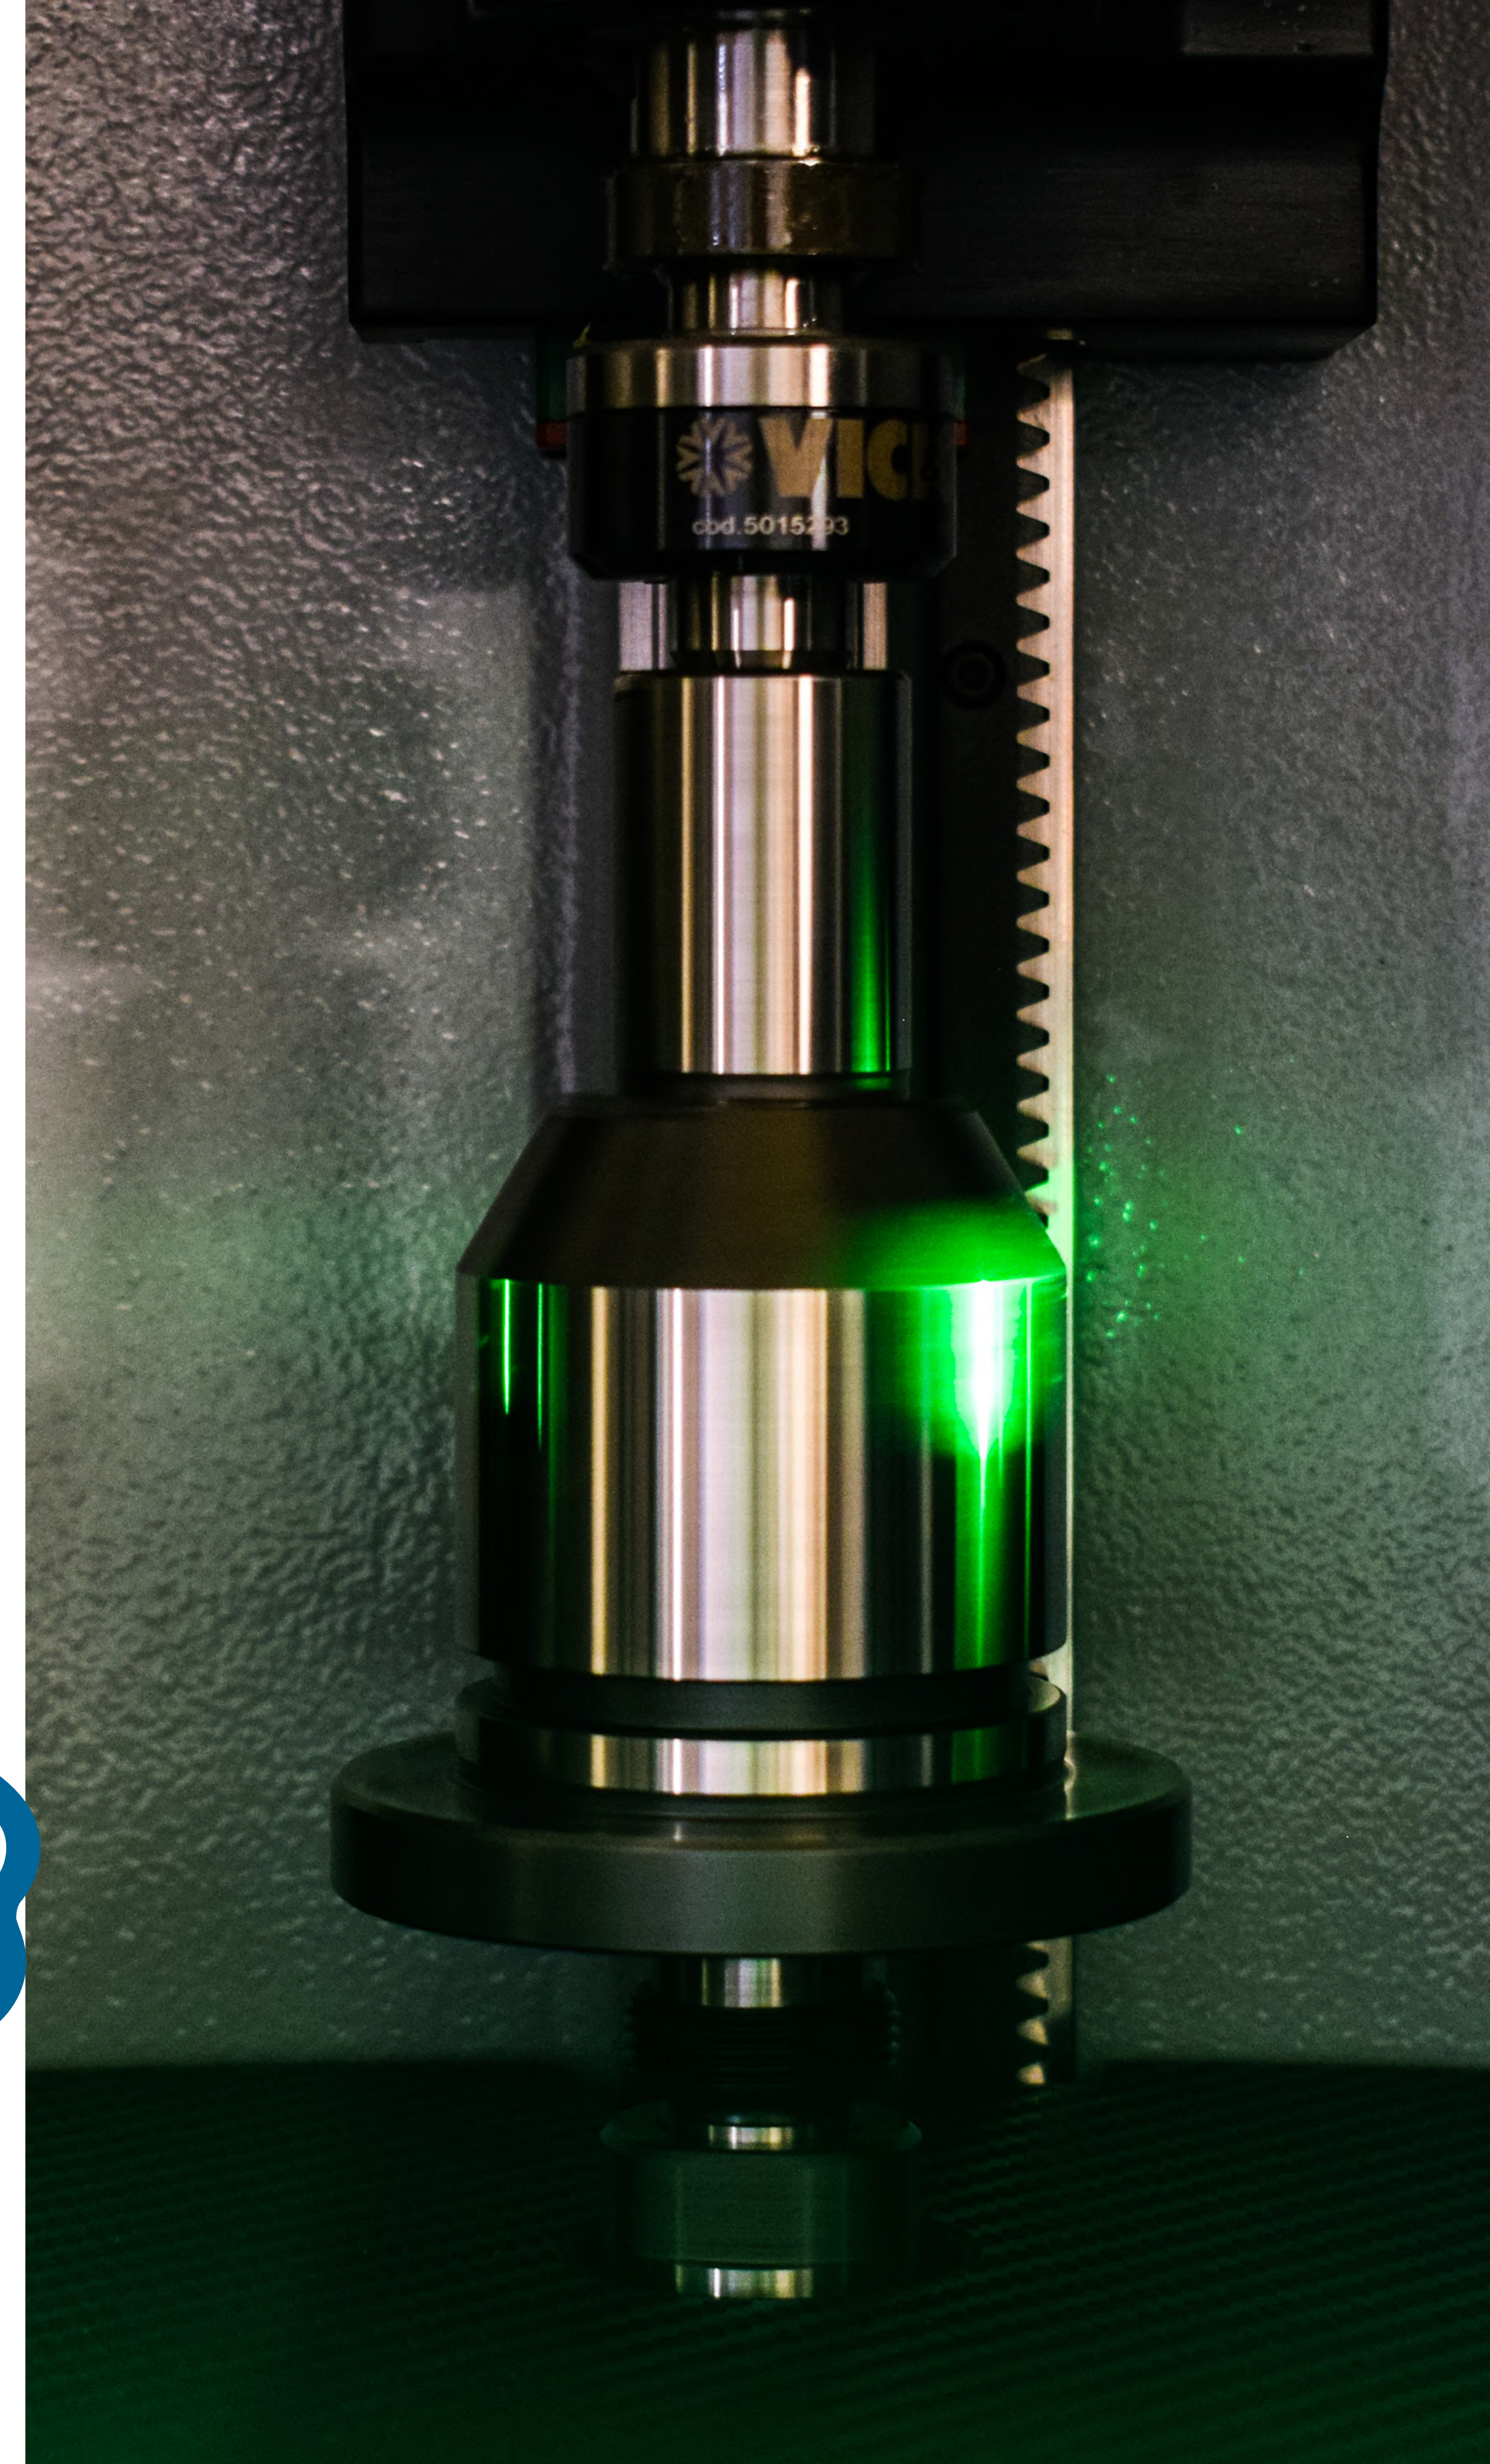

# QUALITY CERTIFICATION

Because Quality is always of fundamental importance and assumes a priority position to compete in national and international markets, the Sudati Meccanica di Precisione Srl has decided to equip itself with a **Quality Management System** according to standards **UNI EN ISO 9001:2015**.

Methodologies aimed at Quality Management are a free choice and, in any case, a need deemed necessary and shared by all the management.

**The Quality Management System finds application on all product lines.**

# MARKETS

Sudati Meccanica di Precisione Srl is active **on both the domestic and foreign markets**.  
The customers of Sudati Meccanica di Precisione Srl are **leading Italian companies**.
